

# Green Space Availability by Census Tract, City of Toronto

Tracts grouped by green space per resident

## Availability Group

- Moderate (3.3–33.4 m<sup>2</sup> per resident)
- Underserved (under 3.3 m<sup>2</sup> per resident)
- Well-served (over 33.4 m<sup>2</sup> per resident)
- Severe Tracts - Bottom 25% overall coverage

This map groups census tracts by green space per resident: underserved, moderate, and well-served. Hatched tracts are underserved and also in the bottom 25% for overall coverage. Of 144 underserved tracts, 122 meet this stricter threshold. Underserved tracts cluster in downtown, the west-central neighbourhoods, the Yonge Street corridor, and parts of the east end, with scattered suburban pockets. Well-served tracts follow the Humber, Don, and Rouge valleys. Underserved tracts are on average denser and more renter-occupied than the city overall.
