

Green Space Composition by Census Tract, City of Toronto

Dominant type of public green space in each tract

Green Space by Tier

- Tier 1 - Formal & manicured parks
- Tier 2 - Natural & trail spaces
- Tier 3 - Other urban green space

Dominant Green Space Tier

- None
- Tier 1
- Tier 2
- Tier 3

This map shows the type of green space present in each census tract. Background colours indicate the dominant tier, meaning the category that makes up the most green space area in that tract, while the overlaid polygons show the actual green spaces. Formal and manicured parks (Tier 1) dominate most of the 577 tracts. Other urban green spaces such as utility corridors and linear parks (Tier 3) and natural and trail spaces (Tier 2) take up a lot less. Because many ravine and valley lands are officially designated as parks, they are classified as Tier 1, so natural spaces are likely underrepresented as a dominant type.
