

Green Space per Resident by Census Tract, City of Toronto

Square metres (m²) of public green space per resident, 2021

GreenSpace PerCapita m²

- No green space per resident
- Less than 5 m²
- 5–10 m²
- 10–25 m²
- 25–50 m²
- 50–100 m²
- 100 m² or more

This map shows the amount of public green space available per resident in each census tract, in square metres. Half of Toronto's tracts provide less than 11 m² per person, and one quarter provide less than 3.3 m². Values are lowest in the densely populated downtown core, west-central neighbourhoods, and the Yonge Street corridor, where large populations share limited green space. The highest values occur in lower-density areas near major valley and park systems. The Toronto Islands tract is an extreme outlier at over 4,700 m² per resident because of its extensive parkland and small population.
